FOREWORD

The 18th All India Livestock Census covering poultry as well as agriculture implements, machinery and fishery statistics conducted in the state of West Bengal was completed in scheduled time by the Directorate of Animal Resources and Animal Health, Government of West Bengal, with 15th October 2007 as reference date.

This report has been prepared to be very effective with rural/urban as well as mouza/parawise elaborate breakups for each district. Moreover the introduction of a Geographical Information System (GIS) since last census year with digital mapping of livestock data at mouza, G.P., Block, Sub-Division (Rural) and District (Rural) level for rural areas and ward, Municipal area, Sub-Division (Urban) and District (Urban) level for urban area has added new dimension to the livestock census of our state.

In this connection I greatly appreciate the well coordinated team work of Dr. P. K. Bhattacharjee, Joint Director of Animal Husbandry (Statistics) as well as Additional State Livestock Census Officer, Shri T. R. Nath, Statistical Officer and Deputy State Livestock Census Officer, 18th Livestock Census, along with other Officers and Staff of the Animal Resources Development Department in making the 18th Livestock Census a successful one.

Like previous years this census report will be most utilized in formulating different welfare plans and schemes for the state as well as in various relevant research projects.

PREFACE

The final report of the 18th All India Livestock Census for the state of West Bengal with reference date 15th October 2007, has been successfully prepared within due time. This vast well compiled report with district-wise mouza/para level data consists of updated basic data on livestock and poultry population, agriculture implements and machinery, fisheries and livestock and fishery infrastructure.

The team of officers whose hard work and co-operation has been indispensable for the timely completion of census work and publication of the report are Dr. P. K. Bhattacharjee, Joint Director of Animal Husbandry (Statistics) and Shri T. R. Nath, Statistical Officer and Deputy State Livestock Census Officer, 18th Livestock Census, along with innumerable district and state-level Livestock Census Officers and Staff.

The information provided in the report will prove very useful to all those who use animal husbandry related data in their respective work areas.

INTRODUCTION

The Directorate of Animal Resources and Animal Health, Government of West Bengal in co-ordination with Government of India, Department of Animal Husbandry, Dairying and Fisheries, has completed the 18th All India Livestock Census in the state of West Bengal in due time. Apart from enumeration, supervision, compilation and tabulation, this huge census work also involves publication of both hard and soft copies of the report.

Dr. P. K. Bhattacharjee, Joint Director of Animal Husbandry (Statistics) and Additional State Livestock Census Officer, 18th Livestock Census, West Bengal, Shri T.R. Nath, Statistical Officer and Deputy State Livestock Census Officer, 18th Livestock Census, West Bengal and many other Officers and Staff of this directorate have efficiently shouldered the responsibility of completing the census work with perfection.

Planners as well as all people working in animal resources and associated sectors will be amply benefitted from the useful findings of this elaborate census work.

TECHNICAL ASPECTS OF THE 18TH LIVESTOCK CENSUS

The total count of livestock population and its composition is available from the livestock census, which is the most important single source of data. The Department of Animal Husbandry, Dairying and Fisheries, Ministry of Agriculture, Government of India, conducted the 18th Livestock Census with reference date 15th October 2007. The census operations are carried out in different States and Union Territories by the respective State Governments. Undoubtedly an expensive statistical exercise this census is indispensable for understanding the demographic structure of our livestock so as to be properly equipped to carry out livestock improvement programmes in the country. The livestock census covers not only livestock but includes information on fisheries and agricultural implements and machinery.

In 1919-20, the first livestock census of cattle was conducted. The subsequent censuses were conducted at intervals of five years. 18 such livestock censuses have been completed till now.

In the 18th Livestock Census, breed-wise data of indigenous cattle, buffalo, sheep, goat, pig and fowl was collected for the first time in the State of West Bengal. In the present report the cross-bred and indigenous cattle have been clubbed together as in the earlier reports for comparability with the past.

Canvassed schedule of enquiry in each household obtains information on 512 items for each household. In addition, information on another 127 items on livestock and fishery infrastructure and commercial poultry birds stock is collected for each mouza, ward and each commercial poultry farm. Field workers undertake house-to-house enumeration to ascertain stock of livestock, agricultural implements and machinery, fishing craft and tackle (as well as number of persons engaged in fishing and ancillary activities), etc., possessed by households and institutions. The field work is mainly conducted by primary workers, consisting of staff drawn from the Animal Resources Development Department and Pranibandhu personnel¹.

State-level training of trainers was arranged at Barasat, in the district of North 24 Parganas. A manual of instructions was circulated to all districts. State-level Livestock Census Officers and Headquarters Officers of the Statistical Cell also trained the block/municipality/sub-division Livestock Census Officers. The trained officers in turn trained the enumerators in the field work. A tabulation manual was prepared and sent to all districts to obtain the data in tabulated form.

Livestock, Poultry, Agricultural Implements and Machinery, and Fisheries are the four main parts of the Livestock Census. As these four parts involve a huge amount of data compilation, appropriate software called LCMS (Livestock Census Management System) has been developed. In West Bengal Geographical Information System (GIS) has been developed for digital mapping of livestock data at all levels for each district. The systematic data base prepared in the 18th Livestock Census goes down to the level of mouza/para. The district profile includes pictorial graphs and the write-up gives a comprehensive account of the State's livestock position.

¹educated unemployed youths trained in livestock care by Paschim Banga Go-sampad Bikash Sanstha, a Govt. of West Bengal organisation.

I would like to place on record my deep appreciation for Sri Anisur Rahaman, Hon'ble Minister-in-Charge, Animal Resources Development Department, Sri D.K. Chakraborty, IAS, Principal Secretary to the Government of West Bengal, Animal Resources Development Department and Dr. K. Saha, Director of Animal Husbandry and Veterinary Services, Directorate of Animal Resources and Animal Health for their constant encouragement in compilation of the Report on the 18th Livestock Census. Their valuable suggestions have greatly contributed to the successful completion of the Livestock Census.

We are thankful to Dr. D.K. Das, Chief Executive Officer, Paschim Banga Go-sampad Bikash Sanstha, for his encouragement in the engagement of Pranibandhus in the enumeration work.

This report has received immense help and cooperation from all officers and staff of the Animal Resources Development Department. I wish to express my sincere appreciation to all of them for their whole-hearted support.

The preparation of the report has been made possible primarily due to the keen interest of Sri Tushar Ranjan Nath, Statistical Officer and Deputy State Livestock Census Officer, 18th Livestock Census, West Bengal who worked very sincerely and with great zeal in achieving the target of releasing the results in the shortest possible time. Sri Nath developed the aspects of computerization, digital mapping and analytical work, and prepared the district profiles with the Assistance of Dr. Arindam Kundu, Statistical Officer and Assistant State Livestock Census Officer, Smt. Supriya Roy, Bengali Translator and Assistant Livestock Census Officer (Publicity) of this Directorate has also worked hard to make possible the elaborate and informative introductory write up on each of the nineteen districts and for the state of West Bengal as a whole. I also acknowledge the contribution made by other officers and staff of the Statistical Cell in bringing out the results in a very short time.

The statistical help received from the Bureau of Applied Economics and Statistics, Government of West Bengal, Department of Animal Husbandry, Dairying and Fisheries, Ministry of Agriculture, Government of India and other different organisations/institutions for various analytical parts of the Report is thankfully acknowledged.

The management of Silpabarta Printing Press Ltd (a Government of West Bengal Undertaking) and workers deserve appreciation for their unfailing cooperation in printing of books and computerized tabulation.

I am sure that scientists, researchers, policy planners and livestock data experts will benefit immensely from the information contained in this publication. We look forward to suggestions and comments on the information contained in this publication, which will be valuable for our future publications.

JALPAIGURI DISTRICT PROFILE

INTRODUCTION :

Jalpaiguri, the largest district of North Bengal covering an area of 6245 sq. km, was formed in 1869. Veined by mighty rivers like the Teesta, Torsha, Jaldhaka, Diya, Neora, Sankosh etc. this piece of land has been aptly named as the land of "Tea, Timber, Tourism" and "Totos" (a rare tribe). A major stretch of area is bordered in the north by Bhutan and hence the name DOOARS/DUARS which mean Door of Bhutan. Jalpaiguri town is the head quarters of the district which is also the head quarters of North Bengal. The main railway station is at New Jalpaiguri which is connected by express trains to all major Indian cities.

LOCATION :

The district lies between 26°16' and 27°0' north latitude and between 88°4' and 89°53' east longitude. It comprises an area of 6,245 sq.km. as on 1 July 1971. The present district consists of the Western Duars since 1865 and the Jalpaiguri and Rajganj thanas of Rangpur district since 1869. The district so formed in 1869 is bounded in the north by the Darjiling district and Bhutan, in the east by Assam, in the south by Rangpur district in Bangladesh and Koch Bihar district and in the west by Darjeeling district and part of Bangladesh.

ORIGIN :

Jalpaiguri is said to have derived its name from olive trees (Jalpai in Bengali) which grew in the town and were seen even in 1900. The suffix 'guri' means a place. The name might as well be associated with Jalpesh, the presiding deity (Siva) of the entire region who had been in the minds of men there from time immemorial.

We might also recall that the Jalpaiguri subdivision of Rangpur, so named since 1854, was coterminous with the earlier Sukhani subdivision and it was the nucleus of the district, formed in 1869. The local name of a place like Jalpaiguri, which happened to be the seat of a military cantonment, thus gave first its name to the subdivision and then to the district. Earlier in March 1849, Hooker had arrived at Jeelpigoree, which was then a large straggling village near the banks of the Teesta, a good way south of the forest and at this place according to him, 'we were detained for several days, waiting for elephants with which to proceed northwards.' Naturally, 'Jeelpigoree' was then a point of transshipment in an area covered by forests.

The district has two well defined areas differing both in history and in administration. The older portion, mostly to the west of the Tista, is a permanently settled area, i.e. settled permanently with Zamindars since 1793. The area to the east of the Tista is known as the Western Duars and is a strip of submontane country. Until the Constitution of India came into force on 26 January 1950, the Western Duars of the district like the Darjeeling district was included in the list of Scheduled Districts under the Scheduled Districts Act of 1874. The early history in this connection may be traced from the East India Company Act, 1773, known as the Regulating Act, which conferred legislative powers upon the Governor-General in Council for the first time. The Western Duars area was outside the regulated zone, and under executive orders of Government some of the laws of the regulated territory were applied to this area. The Scheduled Districts Act of 1874 provided for application of some of the laws of the regulated territories to this district. The Government of India Act of 1919 declared the Darjeeling district, the Duars and Jalpaiguri to be backward areas and the Governor-General was given powers to issue notifications directing that an Act of the Indian legislature shall not apply in those areas except with such modifications and exceptions as he may direct. Since the promulgation of the Indian Constitution there is no such thing as a scheduled or non-regulated district.

The district had many administrative changes since its formation in 1869. The Commissioner of the Koch Bihar division was at first the controlling authority in respect of civil and criminal matters. The district was included under different divisions successively for administrative convenience. In 1875 it was placed under the Rajsahi-Kochbihar division with Jalpaiguri as Headquarter. In 1883 Raisahi division was the controlling authority of the district with Jalpaiguri as Headquarters. In 1957 it was placed under the Presidency Division with Calcutta as the Headquarters and it was in 1963 that the Jalpaiguri Division was formed with Jalpaiguri as its headquarters and the district, naturally, was placed under this division.

HISTORY :

The geographical boundaries that constitute the Jalpaiguri district of the present day had been under the control (administration) or rule of various dynasties or even countries either in fragments or as a whole during the different phases of history

As history goes by, when Hiuen Tsang visited Assam, a major portion of today's Jalpaiguri was a part of the kingdom of Kamrupa which then apparently extended up to river Karatoya in the west. This land, commonly designated as Duars had often been included in the kingdoms of Bhutan and Cooch Behar. The name 'Duars' may have evolved from the word 'Doors' or passages. There were eighteen such passages which were used by the Bhutanese people to communicate with the riverine plains of the south for the cause of trade or barter. In 1864 under the command of Captain Hedayet Ali, the British managed to capture this area from the clutches of the Bhutanese kingdom and divided it into two parts. The eastern parts are merged with the Gowalpara district of today's Assam and the western part was named as a new district Western Duars. In 1869 through some constitutional changes the Jalpaiguri District was formed. The name Jalpaiguri may have evolved from "JE-LE-PE-GO-RI" probably meaning the place to exchange or barter warm clothes, blankets etc. with other essential commodities.

From time immemorial this land remained a pristine creation. Covered with dense forest and riverine grassland. Jalpaiguri was the harbour of one of the richest bounties of Wild Life.

It had seen the arrival of various Indo-Mongoloid tribes, who came in to settle in this fertile land. Most of them continue to live on even today. The majority of the Indo-Mongoloid class are the 'Raj Bangshis'. Apart from them there are the Mech, the Ravas, the Totos etc. Some Limbus and Lepchas had also (migrated) immigrated through the terrain crossing Mechi River. Then, came the British, and with them the Bengalees from present Bangladesh. Many forest areas got cleared for Tea Plantation and Agricultural lands. The planters brought from the Chotanagpur Plateau area - the Nageshias, the Uraons and the Mundas to work as labour in the Tea Gardens. All these various tribes brought along with them, their culture and beliefs.

Though different varieties of races and their cultures got intermingled in the same land; each individual race retained their individual culture and heritage over the ages. Thus the phenomenon of 'Combined Culture' never got a chance to bloom here. In the serenity of the forests, beyond the misty curtain of the hills or by the gushing streams here and there developed and prospered various cultures like the Bhotia Culture, the Rajbanshi Culture, the Lepcha-Limbu Culture together with the Cultures of the Koch, the Mech, the Ravas, the Totos and the Bengalees.

TOPOGRAPHY :

The entire topography is crisscrossed with rivers, rivulets and hills. The district has a rectangular shape, the length being from west to east. The present bed of the Mahananda which is approximately situated over the old bed of Tista formed the western boundary before 1787. After 1787 the Mahananda became the western boundary, while the eastern boundary is formed by the Sankosh. The area west of the Tista has very little waste land and has an abundance of 'Sal' forests and has a widespread growth of bamboo betelnut, palm, are Jackfruit. The tract east of the Tista presents the look of a flat strip of country. The Tista itself has some char lands growing valuable timber, but in the floods of 1950 and 1958 most of the char lands had been washed away. The Western Duars

have many rivers and streams intersecting the area in every direction. There are also large areas of sal forests, heavy grass and reed jungle interspersed with wild cardamoms. The entire area is full of tea gardens covered by thick tea bushes all around. The scenery to the north of the Duars is picturesque, specially where the large rivers debouch into the plains.

The most impressive forests are between the Dima and the Jayanti and between the Jayanti and the Sankosh. The reserved forests with small patches of cultivated lands and villages can be seen at these places. The forests to the west of Torsa, namely, Chapramari, Garumara and Madarhat present a splendid sight. Such views are also presented by the Nilpara and Chilapata Mendabari forests between the Dima and Sankosh.

The Buxa area is the only mountainous tract of the district. Chhota Sinchula (5,695), one of the highest peaks of the Sinchula range, offers a splendid view all around. Numerous rivers and streams intersect the extensive tracts of sal and other forests reaching up to the hills. The Sinchula range has an elevation between 4,000' and 6,000', the highest peak Renigango being 6,222' above sea level. Below Sinchula and on a range of hills between 1,659' and 2,457' is situated the former political prisoners' camp which was located in the erstwhile Buxa cantonment. The Sinchula is much wooded, though it can be reached by men and the beasts of burden from all sides.

SOIL :

Jalpaiguri district is almost entirely covered with alluvium, except that a narrow belt of hard rocks is exposed along the northern border of the district.

In conformity with the general geological setting in the Himalayan tract of North Bengal, the foothill belt comprises the Siwaliks in the south, separated from the impersistent Gondwanas by the Main Boundary Fault in the north. The Buxa group of rocks attain maximum thickness here, and is best developed in the whole of North Bengal. It follows the Gondwanas in the north, forming the southern flank of the Dalings.

Dolomite is the most important economic material in Jalpaiguri district. Detailed work has been carried out to assess the dolomite resources in this area. The reserve of dolomite is really vast.

CLIMATE :

The climate of this district is similar to that of the districts in the plains to the south, but owing to its proximity to the hills, the rainfall is much heavier and the temperatures seldom excessive ranging from 30.9 to 10.8 degrees throughout the year. The cold season is from mid-November to the end of February. This is followed by the hot season from March to May. The period from June to about the beginning of October is the south west monsoon season. October to mid-November constitutes the post-monsoon season.

The atmosphere is highly humid throughout the year. During the period from February to April, the afternoon relative humidities are comparatively lower, being only between 40 and 50%. Some of the cyclonic storms and depressions which originate in the Bay of Bengal in the south-west monsoon and post-monsoon seasons move in a northerly direction and affect the district causing widespread heavy rain. Thunderstorms occur all the year round, being least frequent in the winter.

WATER RESOURCES :

The rivers which are numerous and flow north-south, originate from Sikkim, Bhutan and Darjiling hills (except Torsa which originates from Tibet), and can be divided into two systems, namely, the Brahmaputra river system and the Ganga river system. The Brahmaputra river system contains the following rivers, namely, Tista (with its tributaries), Jaldhaka, Torsa, Kaljani, Raidak and Sankosh, while the Ganga river system contains the Mahananda with its tributaries.

Mahananda : The Mahananda, originating at Chimli at an altitude of 2,060 m. or 6,763' in the Darjiling district and flowing in a southerly direction, alters its course slightly at Siliguri and then enters the Jalpaiguri

district, remaining there for some distance. It has a total catchment area of 25,043 sq. km. (9,669 sq. miles) at its confluence with the Ganga out of which 6,755 sq. km. (2,608 sq. miles) lies in West Bengal.

The river also goes by the name of Mahanadi which is said to be a Bengali corruption of the Lepcha word Mahaldi. The river also receives at various points three small branches, which arise from springs in the fields of Sannyasikata. They are called Trinai, Ronchondi and the divided courses of Chokor and Dauk.

Tista : The Tista is the largest river of North Bengal and passes through this district. It originates from the glaciers of North Sikkim at an altitude of 6,400 metres (21,000'). Large parts of Sikkim and Darjiling district form its catchment before it enters the plains near Sivok. It enters the district at its north-west corner. It is formed mainly by the union of two streams, Lachen and Lachung at Chunthang in Sikkim. The Chinese pilgrim Yuan Chwang crossed this river to go to Pragjyotishpur. It is said that the Bodos named this river Tista or Dista as in the Bodo language ti and di stand for water.

The Tista after being fed by several tributaries in the Himalayan and sub-Himalayan regions, is narrow and deep, before entering the plains near Sivok. After entering the plains, it is, however, considerably wide ranging from 3.2 km. to 10.8 km. (2 miles to about 7 miles). In the sub-Himalayan plains, it is again joined by several tributaries, namely Lish, Gish, Chel and Neora from the north-eastern and Karala from the north-western sides. The Tista has been changing its course for years.

At the time of Rennell's survey (1779) the Tista below Jalpaiguri branched off into three channels, namely, the Dhopa Punarbhaba to the south-west, the Atrai due south and the Jamuna to the south-east. These streams then discharged themselves into the Ganga, the Atrai being the major channel. There was a very small branch of Atrai flowing south-east known as Tista creek which discharged itself into the Brahmaputra system.

Karala : The Karala river is one of the tributaries of the river Tista on its right bank.

Dhardhara : A tributary named Dhardhara having a catchment of 5.4 sq. miles falls into Karala within the northern extension of Jalpaiguri town near the hospital.

Chuk Chuka : Two other tributaries named Chuk chuka and Ruk ruka also fall into Karala within the northern extension of Jalpaiguri town near the Engineering College.

Duduya : Duduya is formed by the combined waters of the Goyerkata, Nanai, Angarbhasha and other small streams, all of which rise in the north-west of the Duars.

Mujnai : The Mujnai rises in the southern slopes of the Bhutan hills near Hantupara and after winding in a southerly direction enters Koch Bihar just below Falakata.

Torsa : The Torsa originates in the Chumbi valley in Southern Tibet at an elevation of 7,060 metres (23,180'). It flows for about 144 km. (90 miles) in West Bengal. The river bifurcates into two courses, namely, Chaur Torsa (West) and Sili Torsa (East) just below the Hasimara road bridge. Before 1954, Sili Torsa, the eastern course, used to carry the major portion of the discharge. At present, however, Sili Torsa is the major channel.

Kaljani : The Kaljani is formed by the combined waters of the Alaikuri and Dima, these two taking the name of Kaljani after their junction at Alipur Duar. It has a course of only a few miles in the district, marking the boundary with the Koch Bihar district. It has no important tributary on its right or west bank, but on the left or east bank it gets the waters of the Nanai, Cheko and Gadadhar. The Alaikuri is a large river, supplying the greatest quantity of water to the Kaljani. The Dima is a sizeable stream rising in the lower Bhutan hills near Buxa and flowing south to its confluence with the Alaikuri.

Raidak : The Raidak rises close to mount Chomolhari in Tibet. It flows southwards till it enters the Koch Bihar district. In its northern course through the Jalpaiguri district it forms a large island by throwing off a branch stream called the Mainagaon nadi, which leaves the Raidak at the point where it enters the district and joins it again about ten miles lower down. The old course of the river forms the boundary between Alipur Duar and Bhalka, but in 1905 the river came down in high flood and deserted its former bed which lies to the east of the Raidak Tea Garden; it swept across the country and poured its waters into many small

streams to the west of its former course, one of which, the Dharla jhora, is now the main stream and runs to the west of the Raidak Tea Garden. In 1930, it left its old bed and moved east near Teamari. In 1933, it broke through the forests at Newlands on the east and at Chipra on the west.

Sankosh : The right bank of the Sankosh forms the boundary of the district with Assam. The Glentani is its principal tributary on the right or west bank.

Jaldhaka : The Jaldhaka originates from the Bitang lake area in Sikkim at an altitude of 4,420 metres (14,500') and flows through Sikkim, Bhutan, West Bengal and Bangladesh where it ultimately falls into the Brahmaputra. Its principal tributaries within the district are the Murti, a big stream, flowing down the Dalingkot mountains in the Darjiling district, and the Dinah, another big stream, which rises in the Bhutan hills and falls into the Jaldhaka on its east bank.

Springs : There is a mineral spring near Buxa, about three miles from Tashigaon in which people take bath to cure themselves of skin diseases.

Floods : The district being situated in the Himalayan foothills, crisscrossed by Himalayan rivers, has always been liable to floods. The reasons for high floods are excessive rainfall of small duration on small catchments, continuous rainfall of several days on bigger catchments, the simultaneous melting of snow accumulated on high mountains and rainfall in lower reaches and sudden bursting of artificial water storages in hills caused by heavy land slides which block river channels. Besides, the area lies in a seismic belt, and as a result, earthquakes loosen the hillsides in the upper region causing slides and slips of sedimentary rocks. With the increase in population and improvement of the communication system, there has been encroachment on forest land. There has been large scale deforestation, jhum cultivation on steep slopes, uncontrolled grazing of cattle, extraction of forest produce by dragging timber on slopes, causing aggravation of landslips and surface erosion.

The silts and debris, thus collected, are carried from hills and ultimately deposited in riverbeds in the plains. The gradual raising of the riverbeds have resulted in severe bank erosion and floods to the countryside. The river widens with the formation of many channels and shoals in the middle. The wiping away of high river bank causes overflow of banks even at low water level and thereby the water is diverted through the neighbouring deep water channel. The old course is then abandoned. Floods in the district are therefore caused by the very nature of the river system.

While the rivers flowing in gorges in the hills cause erosion of soil cover and landslips, in the plains the problem is more acute. There is erosion, sudden tearing away and inundation of valuable agricultural lands, tea gardens, villages, etc. The inundation leaves behind large deposits of coarse sand on agricultural lands rendering them unfit for cultivation for a long time, besides causing dislocation in the communication system.

Tista Guns : There is a peculiar phenomenon, locally called the 'Tista Guns', connected with both the Tista and the Torsa rivers. Some say it has stopped now. In rainy weather, specially during May and June, the said Tista Guns, that is, some loud booming reports originate from the river beds and occur with frequency, usually in rounds of two or three. The sound is like cannon reports. The said reports were heard in 1924 and also in 1952. The reasons for the origin of the sound have not yet been found.

FLORA & FAUNA :

The climatic condition has influenced the vegetation. Heavy rains and hot summer days have made the climate damp and warm, favouring the growth of a wet and evergreen forest. Such forest is found only in small patches, while tropical semi-evergreen and the savannah are the different types met with in the area.

A special type of vegetation is met within some places called creeper jungle. In addition to the canes found in creeper jungles there are cane brakes in the evergreen type of forests on the eastern parts of the district. In damp surroundings a graceful palm forms small societies.

Bamboo groves are also found near villages. Tea gardens occupy a large area of the district and form a characteristic feature of the vegetation. The uniform tea bushes, with their tops pruned to the same level have tall slender plants scattered in between, for imparting shade.

Among the cultivated field crops rice is the most important. Jute has become next in importance, and as in other districts of the State. Then come potato and the betel vine. Maize is also cultivated on a large scale.

The sal (*shorea robusta*) trees predominate the forests. The sal here is of the best quality in India. The forests are mainly of four types, namely, riverine, plains, hill and savannah. Near the streams and moist pockets there occur a type of evergreen forests called North Bengal tropical evergreen forests. The hill forests do not bear any pure crop and have very little economic use. The Fauna is best seen in the Wild Life Sanctuaries located here.

Jaldapara Wild Life Sanctuary : Jaldapara Wild Life Sanctuary has a varied collection of wild life. It is situated in the Alipur Duars subdivision, the nearest railway station to approach it being Hasimara on the North-East Frontier Railway. The sanctuary was made for preserving the famous Indian one horned rhinoceros which inhabited the savannah forests. Now various other animals are also found there.

Mammals : Apart from the one-horned rhinoceros, the sanctuary abounds in gaur, elephant, tiger, leopard, sambar, hog deer, baring deer, spotted deer, swamp deer, pig, sloth bear, cats of various species, and various kinds of reptiles, birds and fishes

Gorumara Wild Life Sanctuary : The Gorumara Wild Life Sanctuary covers an area of 2,129 acres or 5.32 sq.km., the nearest railhead being Chalsa railway station on the North-east Frontier Railway. The sanctuary abounds in rhinoceros, elephant, tiger, bison, sambar, barking deer, hog deer, buffalo, pig fowl, etc. It has also the same kinds of other mammals and birds as are to be found in Jaldapara. It was declared a wild life sanctuary in 1949 and spreads over Lower Tandu, Upper Tandu and Diana forest ranges.

Chapramari Wild Life Sanctuary : The Chapramari Wild Life Sanctuary covers an area of 2,373 acres or 5.44 sq. km., the nearest railhead being Chalsa railway station. It also abounds in the same types of wild life as are found in the two other sanctuaries. It was declared a sanctuary in 1941 and it spreads over part of Upper Tandu forest range.

IMPORTANT PLACES :

Rhino

region in Jalpaiguri. The scenic landscapes, magnificent forests, tall elephant grasses and rippling streams are added to the nature of this park. The main attractions are Rhinoceros, Elephant, Gaur, Leopard, Hornbill etc. Gorumara N.F. is closed during rainy season from 16th. June to 15th. Sept.

Chapramari : This wildlife Sanctuary is situated in the foothills of Eastern Himalayas in the district of Jalpaiguri. Can be approached by road from Siliguri or Jalpaiguri. It's 70 km from Jalpaiguri. This sanctuary

Jaldapara Reserve Forest : Located in the flood plains of river Torsa in Jalpaiguri District. Largest population of Great Indian One Horned Rhinoceros in West Bengal is found at Jaldapara. It also provides excellent habitat for the Royal Bengal Tiger and other animals like Gaur, Leopard, Sambar, Chital, Hog Deer, Barking deer etc.

Gorumara Reserve Forest : Located in the flood plains of Murti and Jaldhaka river of the Dooars

Elephants

Bison

is about 20 kms away from Gorumara. It provides a breathtaking view of forests against the backdrop of the Kanchanjunga and other Himalayan peaks. It is the home to diverse avifauna and mammals like Elephant, Gaur, Leopard etc. Chapramari WLS is closed during rainy season from 16th. June to 15th. Sept.

Chalsa : Located at a distance of 57 kms from Jalpaiguri and 7 kms from Malbazar. One can hire vehicle from Jalpaiguri taxi stand or can avail bus from Santipara bus stand. On its way to Chalsa the motorable road passes through a deep forest and tea gardens of duars which is really an enjoyable journey. From the balcony of a room one can enjoy the scenic beauty of hills and tea gardens. The Murti river flows down the small hillock and tea gardens.

Jalpesh Siva Temple : The temple of presiding deity (Shiva) established in the year 1665 by the Koch king Prannarayan is the main point of attraction of this place.

Murti : This place is located in between Gorumara and Chapramari. Excellent scenic beauty is the main attraction of this site. Both Gorumara National Park and Chapramari Wild Life Sanctuary are very close to this place. One can get day visit pass from Jalpaiguri Interpretation Centre to enter the National Park and Sanctuary.

Jalpesh Temple

Buxa Fort

Buxa Tiger Reserve & Buxa

Duar : Touching one state boundary and one international boundary layd the 'Buxa Tiger Reserve' in the eastern dooars of West Bengal. "Buxa Duar" can be approached on foot from Santalbari. The main attractions of BTR is Tiger, Leopard (Black Panther also), Elephant, Clouded Leopard, Himalayan Black Bear, Barking Deer, Gaur, Pangolin, and Python. Buxa Duar is famous for its prison fort.

Khuttimari : Scenic beauty and sighting of wild life is the main attraction of this place.

Rajabhatkhawa : Rajabhatkhawa is 15 km away from Alipurduar town and located in between Alipurduar and Jayanti. A large variety of important flora and fauna exists in this area. Nature Interpretation Centre and Tiger Rescue Centre are points of interest of this place.

Jayanti : Jayanti the forest village is famous for its rich variety of wild life and exotic scenic beauty. A stalactite cave popularly known as 'Jayanti Mahakal' and 'Pookri Pahar' are well known destinations from Jayanti.

Bodaganj, Ambari, Kathambari, Odlabari : Scenic beauty of Forest and tea gardens, somewhere with a backdrop of hills is the main attraction of these locations. Tista barrage is very close from Ambari.

Totopara : Totopara is a small locality in the northwest corner of Madarihat block in Alipurduar sub-division of Jalpaiguri district. This place is inhabited by toto tribal community, one of the three recognised primitive tribes in West Bengal.

Nilpara, Chilabata, Kodalbosti : These places are mainly forests and tea garden areas with good scenic beauty.

Raimatang, Nimati : Location, Approach & Access : Surrounded by rivers and hills and full of scenic beauty, these places have good tourism potential.
